Applied Companies Recognized by Business Community

The San Fernando Valley Business Journal recently recognized Applied Companies and other leaders of the Valley's business community for their contribution to the Valley, the multiple communities and the development of innovative products.

The annual recognition banquet was held in April 2009. Applied Companies was honored with recognition and awarded for the "Most Innovative Product/Service" by the Valley's Business Journal. Specifically cited was Applied Companies' technical and innovative approach for Thermal Management of Tactical Laser Systems and the development of Environmental Control Units for various military C4 (Command, Control, Communications, Computers) applications. Also cited was Applied Companies' other core products; Power Generation and Pressure Vessels.

In a letter to the employees of Applied Companies, Mr. Paul Case company president concluded; "My Congratulations and Thank You to the entire team in being recognized for the innovative and important products and services we provide to the United States service men and women and all of our customers."

The San Fernando Valley is 345 square miles area in southern California with the northern edge of the City of Los Angeles as its' southern boundary. The Valley has a population of approximately 1.7 million.
