

Global Broadcast System (GBS)

GBS broadcasts worldwide (96 MBPS per satellite) over three military UFO/GBS Ka-band satellites and is augmented by leased Ku commercial satellites.

The IP TIP is HUMMWV-mounted and provides mobile, in-theatre broadcast management and uplink capabilities.

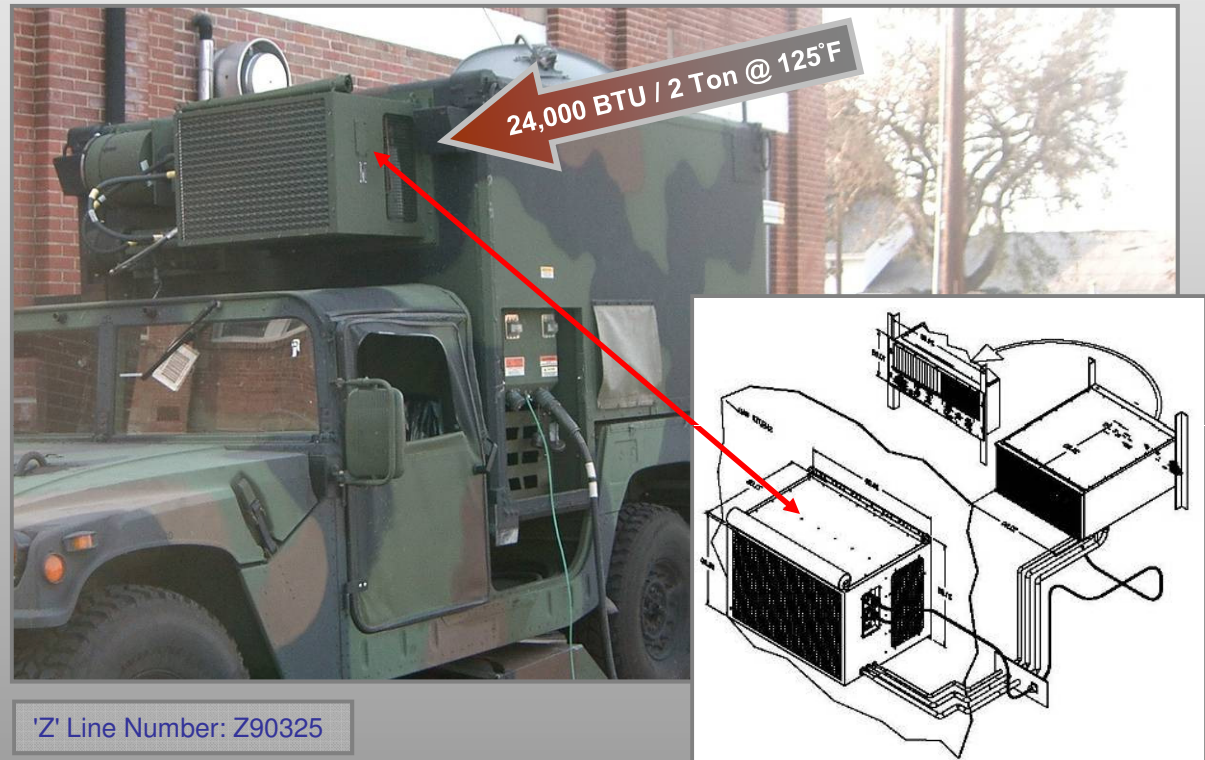

Photo above: New Orleans Naval Air Station in support of Joint Task Force Katrina - The ECU performed flawlessly in the extremely high humidity and ambient temperature making the GBS Shelter a place of respite for the support teams.
